Diving aficionados, discover or rediscover the sites of Indonesia with the crew of the Komodo Sailing.

We propose you dive destinations, all more beautiful than the others, all more unbelievable.

Dive Komodo NP program will bewitch you at the surface and also underwater. With more than 50 dive sites referenced and coral gardens under protection since 20 years, this is a diver's paradise.

Dive Raja Ampat NP cruise offers you an unique diversity of sea life for crustaceans, fishes, shells and all animals attached to the reef. Colourful soft corals and preserved reefs will amaze you. Schooling fishes and other endemic animals will give you the urge to come back. At the surface, the wonderful landscapes of limestone islands, mangrove, caves, passages between islands, labyrinths will fascinate you.

Dive Maratua and the surrounding islands of Derawan, Sangalaki and Kakaban opropose you different kinds of surprising dive sites such as muck or wall dives, coral gardens, lake, drift... You will see big fishs, hammerhead sharks, thresher sharks, manta rays (and many more...) and small, pygmy sea horses, mandarin fishs...

Finally, we propose to sail from Ambon to Sorong or the other way around. This cruise is simply great and takes you through muck diving in Ambon, marvellous reefs of Nusa Laut, Suangi, Koon finishing with the amazing colourful soft coral gardens of Misool.

We also propose to organise the cruise of your needs .The boat is chartered for your own destinations.

You will enjoy the freedom of the liveaboard allowing flexibility for the choice of the sites : our objective is to dive far away from the “bubbles factories” and to guarantee you exclusivity on the reef. You will be taken care of by our experienced guides in order to offer you safe and unforgettable dives in the respect of the environment.

With a maximum of 8 divers, we make the choice of attention, friendship and time to take care of you.

Yield to temptation. Come and share intense and unforgettable moments and dream dives for a good bargain.
